For a more detail instructions please goto:

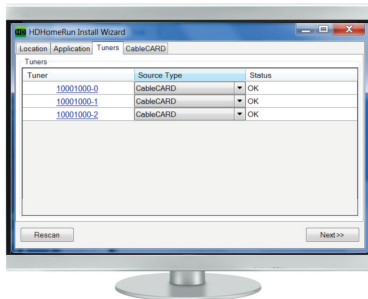

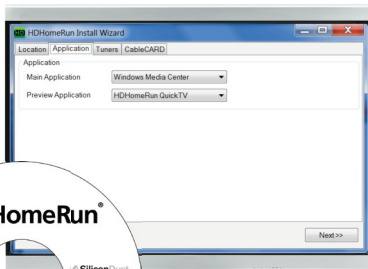

<http://www.hdhome.com/support/hdhome/instructions/prime/>

2

Install HDHomeRun Software

Install HDHomeRun software and follow set up instructions HDHomeRun Install Wizard.

(3CC & 6CC)

3

OPEN Window Media Center in your Windows7 PC

Go to the Extras Library, Select the Digital Cable Advisor, and follow the prompts to install.

Note: If the Digital Cable Advisor Icon is not on the Extras Library, Click on the Extras Gallery.

Go to Tasks > Settings > TV > TV Signal > Set Up TV Signal and follow the prompts to configure your new HDHomeRun PRIME

4. Play Ready and CableCARD Activation

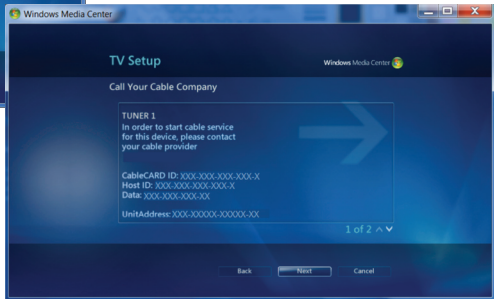

During Media Center set up - you will be required to install Play Ready

You will also be asked to Activate your M-CARD CableCARD supplied by your cable company - follow the instructions on screen - be prepared to call your cable company as instructed on screen.

(3CC & 6CC)

After card is activated by your cable company - continue with Media Center set up by following the prompts.

OPTIONAL Equipment

* may be supplied by your cable provider only as needed

Switched Digital/Tuning Adapter

(Skip this section if your cable provider is not using switched digital video and does not require the use of a tuning adapter/resolver.)

Connect the incoming coaxial cable to the IN port on the tuning adapter, and connect a coaxial cable between the OUT port on the tuning adapter and the CABLE IN port on your HDHomeRun PRIME. Connect a USB cable between the tuning adapter and the USB port on your HDHomeRun PRIME. Connect the power cable on the tuning adapter.
