

Cord Shaving Solution for Cable TV with CableCARD™

*conditional access

The simple way to watch live HDTV Cable TV on your media devices, across your home network.

*CableCARD™ is a trademark of Cable Television Laboratories, Inc.

DVR Solution

Have you thought about making the most of your cable TV service and reducing your costs at the same time.

Receive Premium cable TV, including protected content, allowing you to send glorious high definition content to anywhere in your home over 802.11ac WiFi, or a wired connection from your home router and save costs by cutting the number of boxes you rent from your cable company. With 3 tuners you can watch and record up to 3 shows simultaneously, on multiple smart devices, across your home network giving you the flexibility you need.

You can watch LIVE TV through our HDHomeRun DVR app and you can record, pause, rewind and schedule your favorite shows using the HDHomeRun DVR service*.

You can also watch and record Live TV with our Kodi/XBMC Add-On or you can record, pause, rewind and schedule programs using popular compatible third party DVR software.

*Requires Guide Subscription

For cord shaving. No need to rent set top boxes for every room

Access premium cable subscription channels using CableCARD™

Watch live HDTV on up to 3 devices simultaneously on your WiFi network

HDHomeRun streams to DLNA compatible devices on your network

Works with our HDHomeRun DVR so you can watch, pause and record

Use more HDHomeRun tuners for greater simultaneous TV access.

	No. of Tuners	DLNA streaming	Receives free OTA TV	Receives Premium Cable TV*	HD Television over Ethernet	HD over WiFi** via your home router	Watch on tablets and phones
HomeRun CONNECT	2	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	WiFi ac	<input checked="" type="checkbox"/>
HomeRun EXTEND	2	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	WiFi n	<input checked="" type="checkbox"/>
HomeRun PRIME	3	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	WiFi ac	<input checked="" type="checkbox"/>

*Subscription from Cable Provider required.

**Home router recommended minimum specification. For best playback results, a wired solution is always recommended.

Multi room, multi-user set up

Simply plug your HDHomeRun PRIME into your router, follow the Quick Start procedure then stream LIVE TV around your home.

You can watch HD LIVE TV via WiFi on an 802.11ac router (minimum spec) or a wired connection. You can watch SD via WiFi on an 802.11n router.

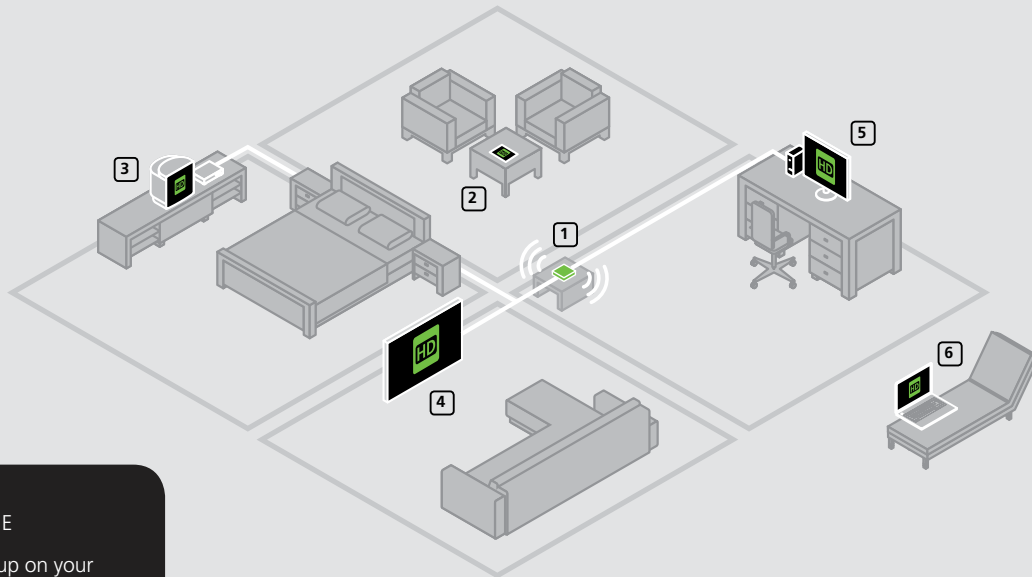

Live TV can be viewed with our own **HDHomeRun app** (which is supported on Windows / Mac / Linux PC or Android devices such as phones, tablets, Kindle Fire, FireTV Box and Android TV).

Or you can activate our full **HDHomeRun DVR** service. It works with your playback and network storage devices adding the ability to watch, schedule and record Live TV.

For your playback devices it's an app that connects to your home network to give you access to Live TV and recordings. Playback devices include Windows, Mac, and Android systems, with additional support on Kodi and Plex.

Plex Media Server users can now record live TV with either an antenna or a CableCARD™ using SiliconDust's HDHomeRun tuners. You can then stream those recordings to phones, tablets, computers, game consoles, set-top boxes, and smart TVs. The feature is currently in beta for Plex Pass subscribers.

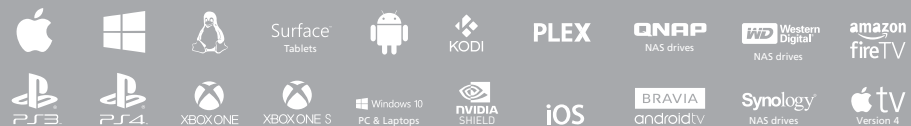

For storage the recording engine runs in the background on your NAS box such as the WD My Cloud.

- 1 Your HDHomeRun PRIME
- 2 Set recordings or catch up on your favorite shows using our DVR app
- 3 Save money on cable boxes by using an existing media player
- 4 Our HDHomeRun DVR app is all ready to use on some Smart TV's (eg. Sony Android TV models)
- 5 Save an entire series on your NAS (network attached storage) drive.
- 6 Pause a show and resume on a different device* (within WiFi range)

* Feature coming soon.

- Cat5e cable
- Power adapter
- Quick start guide

*See My.HDHomeRun.com for complete list of supported NAS devices, 3rd party applications and hardware.

Copy protected channels require support from WMDRM or DTCP-IP

So, what is the HDHomeRun App and DVR service?

We looked at the current media-PC way to record TV. It requires a fair bit of technical know how, high powered media PCs that need to stay on, and often pages of complicated setup.

Enter the **HDHomeRun App**. Simply put, it's the software that works with your playback and network storage devices adding the ability to watch, schedule and record Live TV.

At it's most basic, viewing Live over the air TV around your home on multiple devices has never been easier or as cost effective than with HDHomeRun tuners and DVR. Equally simple to setup is our full DVR service enabling you to schedule whole series recordings and catch up on your favorite shows or those not to miss 'must win' sporting events.

Expandability and flexibility are key - it can be as simple as a laptop or as expansive as a multi-client, multi-NAS, multi-tuner masterpiece...install the app and you are running. Give it a few recording tasks and it goes to work. TV viewing on your terms with **HDHomeRun DVR**.

Our easy setup DVR Solution for Cord Shavers

Digital cable Source

Subscription Digital TV via Cable.

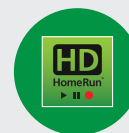

HDHomeRun PRIME

Your HDHomeRun PRIME tuner.
